

Other details - stride

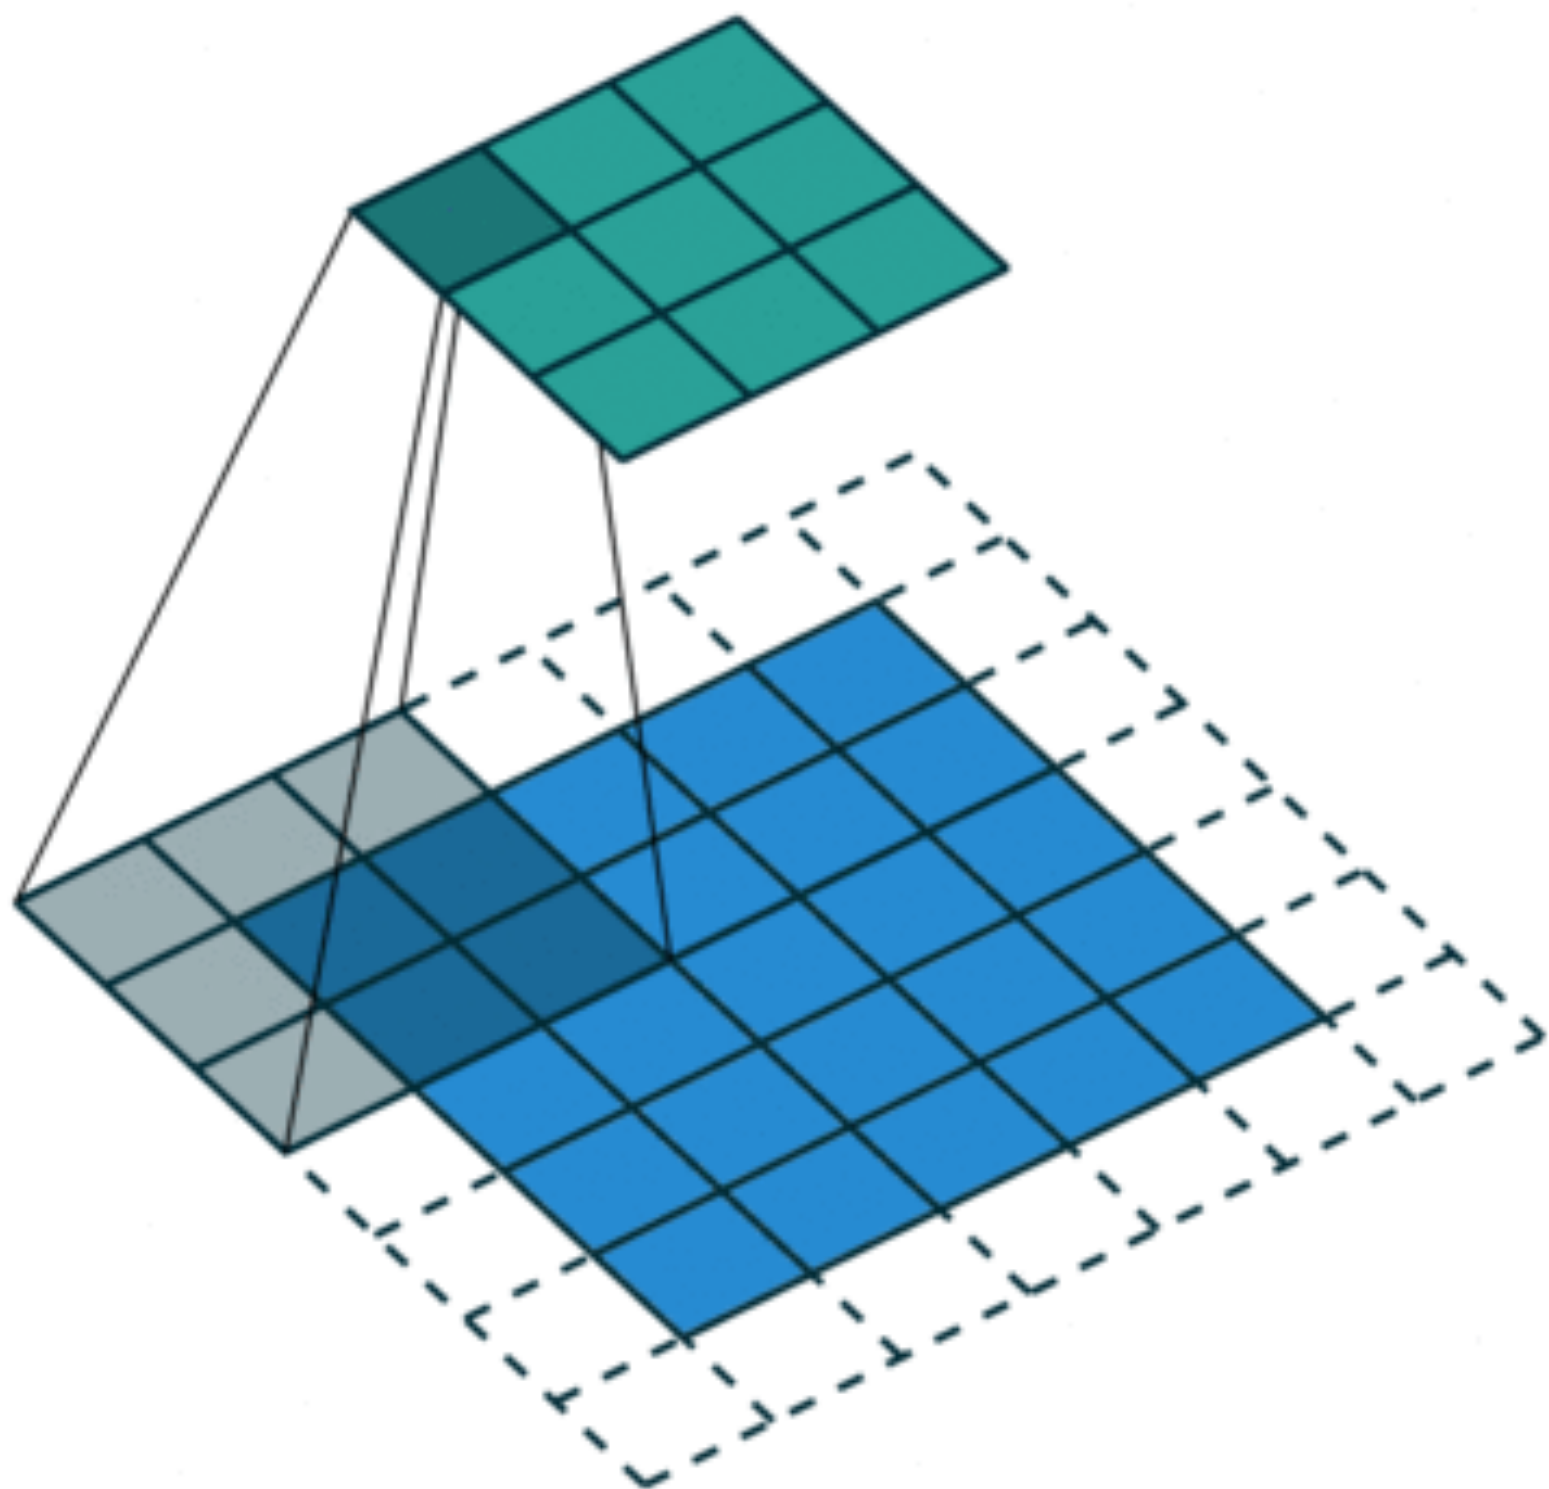

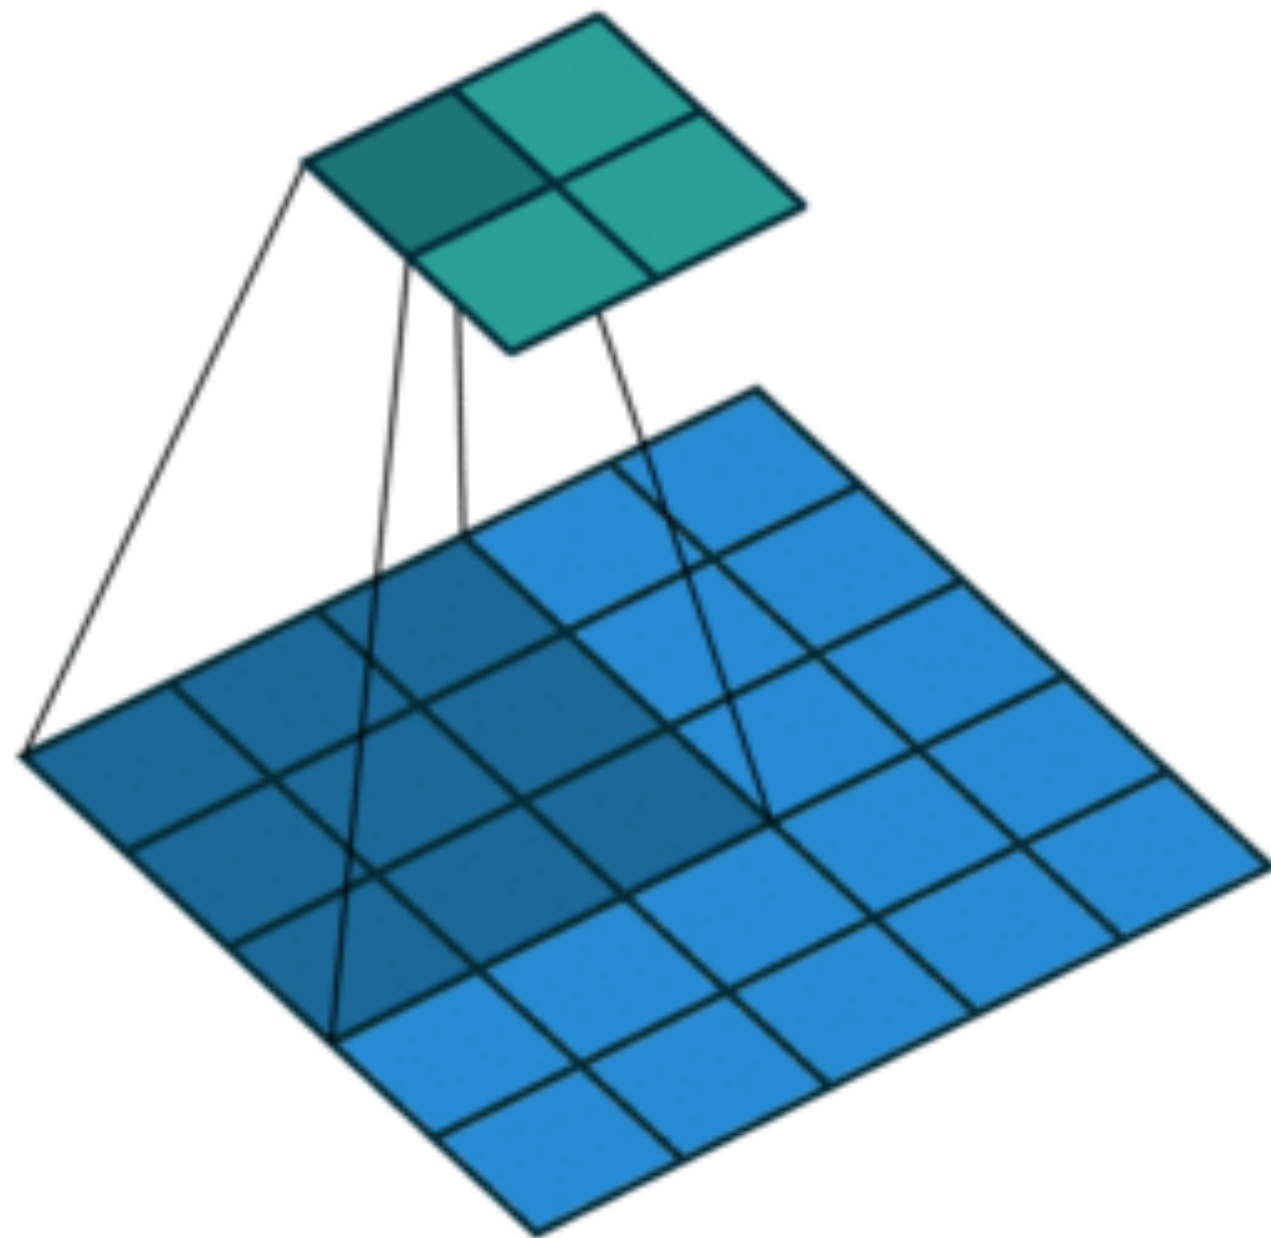

strides = 1

stride == 2, with padding

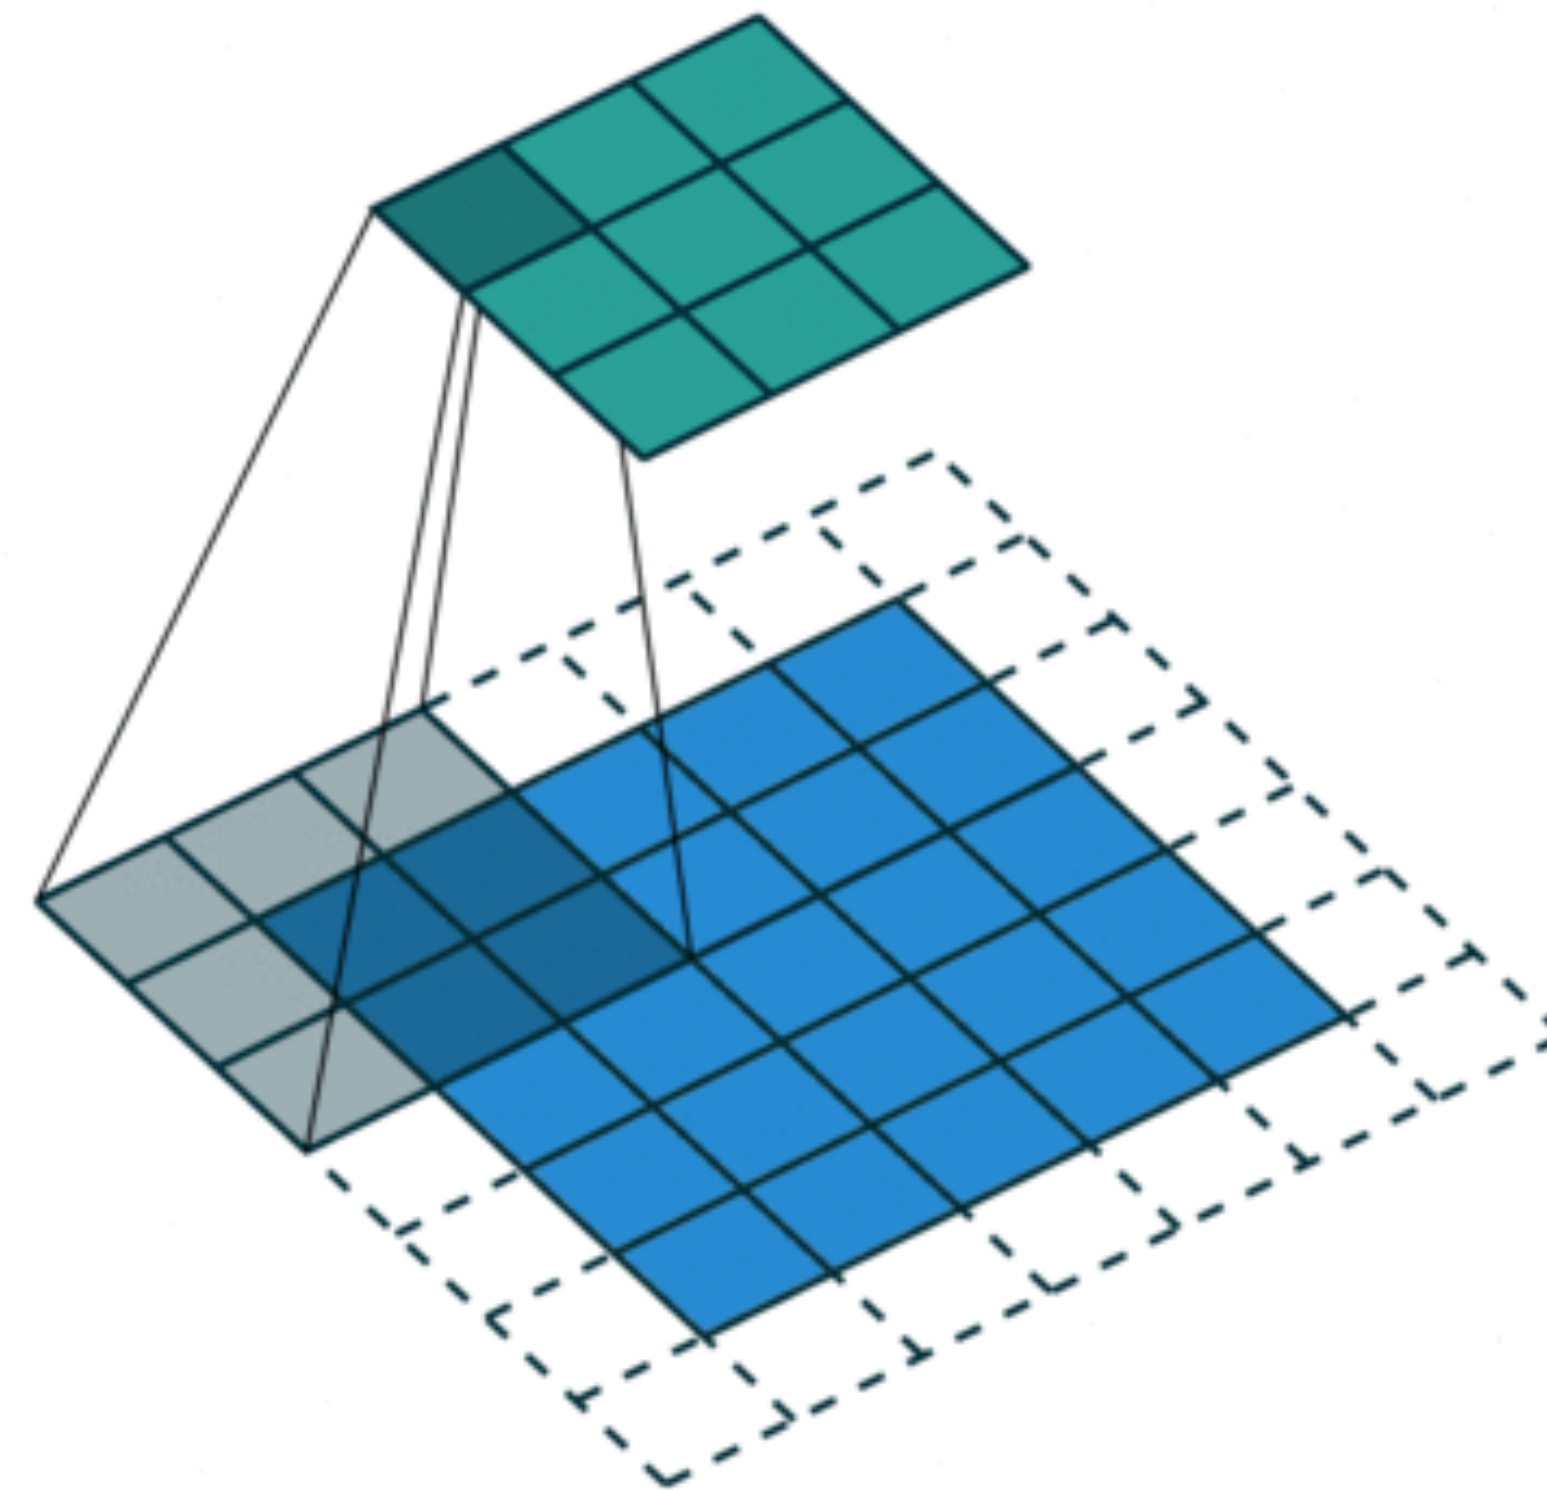

Other details - stride

stride = 1

stride = 2, with padding

What do you think would happen?

Given an image A and the kernel K below

$$\mathbf{G}_x = \begin{matrix} & K \\ \begin{bmatrix} -1 & 0 & +1 \\ -2 & 0 & +2 \\ -1 & 0 & +1 \end{bmatrix} & * \mathbf{A} \end{matrix}$$

Image A
